EXPERIENCE

Consolidated Utilities, Inc, Savannah, GA — Full Stack Software Developer

November 2018 - PRESENT

- I proposed a data collection / report generation custom software that would take a paper system and take full advantage of cloud providers and
- I quickly learned whatever technologies I needed to acquire, whether it was native Android development with Kotlin, or being able to write bash scripts
- This software suite is still in production. I'm not currently looking for a new position until it has been completed.
- Node.js on the backend, React.js on the frontend and AWS have been the technologies I have worked with the most on this project.

Miscellaneous, Savannah, GA — WordPress Developer

JUNE 2018 - September 2018

Was hired by small businesses to create WordPress websites with custom themes and plugins. (<https://consolidatedutilities.com>), (<https://highlandwoodsmhp.com>), (<https://effinghamministorage.com>)

EDUCATION

University of Alabama, Tuscaloosa, AL — Jazz Studies

MONTH 2006 - MONTH 2011

Guitar performance major. My GPA was somewhere around 3.11.

Open Source

I am currently creating an Android version of the popular iOS App [Relisten](#) with some of the developers who created that app. The repository is not yet public but my responsibilities with this project are Android Auto support.
